

The Approval of Oxycontin in 1996 Coincided With (Perhaps Caused) the Industrialization of a National Black Market

Method - For each final DEA quota report printed in the Federal Register:

Prescribed Opiates: add fentanyl + hydrocodone + hydromorphone + methadone + oxycodone (sale) + oxymorphone (sale)

Prescribed Stimulants: add amphetamine (sale) + lisdexamfetamine + methamphetamine + methylphenidate
